

April 2026 UPARC in the Park

Saturday, April 18th 8:15 am setup (9:15a ~ 1:30p operate)

Honeymoon Island State Park, Dunedin, FL (US-1880)

[North Island Playground, North Pavilion](#)

(click link for location in Google Maps)

- This will NOT be a “run what you bring” event this time. UPARC will provide one or two K3 radios, power supplies, antennas and coax.
- Just bring yourself and some drinks, snacks, chairs, sunscreen and bug spray
- We will operate CW, SSB and planning for FT8 on 10, 15, 20, and 40m bands.
- Please try to be at the park when it opens at 8:00a or shortly after to help us get setup quickly. The park does charge a \$4 vehicle fee for single occupants, \$2 for bicyclists/pedestrians.
- No more than 2 stations will be operating at one time. Once a station reaches 20-25 contacts, the next operator in queue can begin calling CQ.
- *If no other operators are waiting, you may continue to operate*
- Listen and learn how to work pileups and get more comfortable operating a POTA activation. If not ready to call CQ yet, help someone out and log for them listen to the flow of things.
- 146.520 & 147.120 (+600khz & PL100hz) will be monitored if you need assistance finding the pavilion once in the park.

Hosted by:

Upper Pinellas Amateur Radio Club

All licensed radio operators are welcome!
